- a. piercing
 - b. chewing
 - c. stinging
 - d. sucking

Name _____

Millipede Quiz – Answer Key

- The number of pairs of legs on a millipede is _____.
 - between 50 to 150
 - between 350 and 500
 - always one million
 - over one thousand
- Millipede eggs are deposited _____.
 - in water
 - in a host
 - in the soil
 - in a tree
- Most millipede body segments have _____.
 - one pair of legs
 - two pairs of legs
 - six legs
 - eight legs
- Most millipedes have _____ bodies.
 - unsegmented
 - cylindrical
 - thin
 - flattened
- Young millipedes add _____ after each molt.
 - only more legs
 - only more segments
 - more wings and eyes
 - more segments and legs
- Most millipedes are _____.
 - scavengers
 - predators
 - parasites
 - carnivorous
- Millipedes contribute to their environment by _____.
 - pollinating flowers
 - breaking rocks into smaller pieces
 - recycling organic material in the soil
 - eating mosquito larvae

Name _____

8. Millipedes have _____ antennae.

- a. segmented
- b. long
- c. feathery
- d. no

9. Millipede mouth parts are adapted for _____.

- a. piercing
- b. chewing
- c. stinging
- d. sucking
